TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Dart, TypeScript
- **Frameworks:** (React, Express.js, Flutter, Django)
- **Database & Backend:** MySQL, PostgreSQL, MongoDB, Node.js, Supabase
- **Design & Media:** UX/UI Design, Graphic Design, Video Editing
- **Basic Cybersecurity**

SOFT SKILLS

- Leadership & Team Management
- Analytical & Problem-solving
- Entrepreneurial minded
- Adaptable & Fast-learning
- Communication & Collaboration
- Time Management
- Creative Thinker
- Results-driven

PROFILE

I am an ambitious, motivated and curious Computer Science student with an entrepreneurial mindset and a passion for solving real-world problems. Analytical and proactive, I bring experience in teamwork, leadership, volunteering, and project delivery. I thrive on learning, collaboration, and taking initiative, consistently seeking to create meaningful impact in every endeavor.

ACADEMIC BACKGROUNDS

Bachelor of Computer Science in Software Engineering 2024-2027
Cambodia Academy of Digital Technology (CADT)
Third-year student with hands-on experience in web development and software engineering projects.

Bachelor of Education (B.Ed) in TEFL 2024-2027
Institution of Foreign Languages (IFL)
Third-year student in the Department of English, focusing on Teaching English as a Foreign Language (TEFL).

PROJECTS

Fullstack Developer MARCH 2026
LeakScope — Black-Box Security Scanner for Supabase Applications

- Built and launched LeakScope.tech, an automated black-box security scanner that audits live Supabase web applications by analyzing publicly accessible assets without requiring credentials.
- Engineered detection for critical vulnerabilities including leaked API keys (anon/service role), misconfigured RLS policies, authentication flaws (BOLA/IDOR), weak JWT implementations, and sensitive data exposure in endpoints and storage buckets.
- Designed and implemented the full scanning pipeline: URL ingestion, JS/HTML/network asset crawling, automated vulnerability testing, and structured security reports with evidence and remediation guidance (including AI-assisted fixes in the Pro version).
- Scaled the platform to 1,450+ applications scanned and ~9,900 vulnerabilities discovered, demonstrating adoption among indie developers and builders using rapid-development tools such as Cursor and Bolt.new.

Mobile App Developer JAN 2026
StockMate — Flutter Offline Stock Management App

- Built an offline-first stock management mobile app using Flutter
- Implemented product CRUD, stock in/out tracking, and low-stock alerts
- Applied Clean Architecture with local database storage
- Added basic stock analytics and dashboard visualization

Frontend Developer SEPTEMBER 2025
AUREA — Portfolio Builder

- Built the web frontend using React + Vite
- Styled with Tailwind CSS for modern, responsive UI
- Optimized for SEO, performance, and fast load times
- Developed interactive portfolio editor for users to create and customize their websites
- Created pre-built portfolio templates for quick setup
- Ensured cross-browser compatibility and smooth user experience

LANGUAGES

- Khmer: Native Language
- English: Fluent

REFERENCES

References are available upon requests

Frontend Developer JULY 2025

PhsarDesign — Creative Freelancing Platform

- Built the frontend using React 18 + Vite
- Implemented fast-loading, SEO-optimized frontend
- Integrated Redux Toolkit for centralized state management
- Used React Router v6 for declarative client-side routing
- Styled the interface with Tailwind CSS for rapid UI development
- Collaborated with backend teams to ensure seamless UX and feature consistency

Fullstack Developer JULY 2025

Automata Visualizer - Django web Application

- Designed and implemented the Automata project to demonstrate key concepts in automata theory and computational algorithms
- Applied Python and additional programming languages for developing, testing, and optimizing automata-based solutions
- Engineered efficient code structures and robust logic to support educational and practical applications in computation

Full-Stack Developer MARCH 2025

Basic Banking System — Java OOP Project

- Built a full-stack banking system using Java and basic Spring for the GUI
- Implemented user authentication, account management, and transaction handling
- Applied OOP concepts: encapsulation, inheritance, abstraction, and polymorphism
- Structured code using clean architecture for maintainability and reusability
- Implemented Basic Admin with staff management

EXPERIENCES

Team Lead

ACTSmart Incubation Program Cohort 1 JULY 12 - DECEMBER 27 2025

- Selected for **ACTSmart**, a tech-focused incubation program supporting Cambodian startups, SMEs, and university entrepreneurs.
- Led the team throughout the 5-month program, gaining hands-on experience in business strategy, startup operations, technical development, and economic insights, and successfully shipped a real-world product with over **130** registered users.
- Exhibited AUREA at 3 events: **Digital Government Forum (DGF) 2025**, **ACTSmart Networking Night**, and **Generation Future 2025: "Demo Day and Exhibition"**.

Team Lead

Turing Hackathon Cohort 8 JUNE 06 - JUNE 15 2025

- Co-founded Phsar Design, a platform helping local designers showcase and sell their creative work.
- Led the team during the hackathon and presented our project to judges, earning an **Honorable Award for** teamwork, and project execution.

Trainer

CADT's Next GEN Engagement Program JULY 23 - SEPTEMBER 16 2025

- Taught JavaScript to first-year students and guided hands-on project work.
- Participated in a project showcase competition, applying technical and project management skills to solve real world problems.

Design Volunteer NOVEMBER ,MAY 13 - JUNE 15 2025

Shadow Design Event - Season 1 & 2

- Designed promotional posters and visual assets for social media and event marketing, improving visibility and strengthening brand consistency.
- Assisted with logistics and media coverage, ensuring smooth event operations and effective presentation of creative work.
